PROFESSIONAL SUMMARY

Senior Full Stack Developer and Team Lead with 10+ years of experience architecting, building, and scaling enterprise-grade web and mobile applications. Proven track record leading and mentoring cross-functional engineering teams of 5+ developers, owning sprint planning, delivery timelines, and team performance for products supporting 10,000+ active users. Deep expertise across the JavaScript/TypeScript ecosystem, including React.js, Next.js, Angular, Node.js, NestJS, and Express.js, with strong command of cloud architecture, microservices, CI/CD, and database optimization. Skilled in stakeholder management, career development, roadmap execution, and cross-functional collaboration, with a consistent record of improving delivery velocity, code quality, and team output.

CORE COMPETENCIES

Technical Leadership: Team Lead, Engineering Lead, Team Management, Performance & Delivery Ownership, Technical Strategy, System Design, Mentorship & Career Development, Code Reviews, Stakeholder Management, Cross-functional Collaboration, Roadmap Planning, Agile/Scrum, Sprint Planning, Jira

Frontend Architecture: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive UI/UX Design, State Management, Lazy Loading, Design Patterns, Best Practices

Backend & APIs: Node.js, NestJS, Express.js, RESTful API Design, GraphQL, WebSockets, Microservices Architecture, System Design, Scalability, High Availability, Fault Tolerance

Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, Query Optimization, Database Indexing

Cloud, DevOps & Testing: AWS, Cloud Architecture, Docker, Containerization, CI/CD Pipelines (Jenkins, GitHub Actions), Git, Vercel, Netlify, Unit Testing, Jest, Cypress, Test Coverage, Code Quality

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer / Team Lead

Sep 2018 – Present

Xminds, Technopark, Alappuzha, Kerala

- Led 5+ developers across 3–4 concurrent projects at any given time, structuring focused sub-teams of 2–3 developers per project — owning sprint planning, task allocation, code reviews, and delivery timelines end to end.
- Mentored and upskilled team members through 1:1 coaching, technical guidance, and career development plans, improving sprint output efficiency and reducing onboarding time for new hires.
- Implemented GraphQL APIs and WebSocket-based real-time features to power live data synchronization and dashboard updates across client-facing applications, including low-latency event and quiz modules.
- Partnered with stakeholders and product owners to translate business requirements into technical roadmaps, balancing scope, timelines, and team capacity across React.js, Next.js, Node.js, and NestJS stacks.
- Drove team-wide performance and quality improvements, boosting Core Web Vitals by 40% and reducing API response latency by 35% through SSR, SSG, caching, and database optimization initiatives.
- Directed integration of 15+ third-party systems and payment gateways (Stripe, Razorpay), coordinating cross-functional collaboration between engineering, QA, and business teams.

Senior Software Engineer

Apr 2016 – Aug 2018

Cordova Cloud Solutions, Kochi, Kerala

- Led development and deployment of hybrid Android and iOS mobile applications using Angular, Node.js, and Apache Cordova.
- Designed and built scalable RESTful APIs with Express.js and MongoDB to support real-time features and responsive interfaces.

- Increased user engagement by 25% through responsive interface enhancements, accessibility improvements, and real-time syncing pipelines.

Junior Developer

Jul 2015 – Mar 2016

Achariya Techno Solutions, Alappuzha, Kerala

- Built modular, responsive web client interfaces using JavaScript, AngularJS, HTML5, and CSS3.
- Developed a reusable UI component library, reducing maintenance overhead and stabilizing front-end build pipelines.

Junior Developer

Aug 2014 – Jun 2015

Neologic, Alappuzha, Kerala

- Contributed full-stack code across frontend views and backend relational data storage for enterprise client platforms.
- Debugged production issues and resolved cross-browser styling inconsistencies, maintaining visual integrity across devices.

KEY PROJECTS

Pixovo – Learning Management System (LMS): Led architecture of a scalable education platform with multi-tier course management, grading rubrics, automated quiz/assignment systems, and e-commerce payment integration.

Comeonda – Interactive Gaming & Event Platform: Engineered a real-time engagement engine with live quiz modules, event gamification, and sub-second data synchronization.

Datazoom – Enterprise Business Analytics Dashboard: Designed an executive BI dashboard with aggregated reporting, multi-dimensional metric visualizations, and data-driven workflow insights.

Isentia – Corporate Expense & Workflow Automation System: Built an automated expense reconciliation engine managing compliance rules, multi-stage reimbursement workflows, and approval hierarchies.

Cricksy – Personal Cricket Platform: Independently designed and built a TypeScript-based cricket information platform, managing the full stack from data architecture to UI (github.com/akhilrameshk).

EDUCATION

B.Tech in Information Technology — College of Engineering Poonjar, Kerala (2007 – 2011)

Higher Secondary Education (Plus Two) — SDV HSS, Alappuzha, Kerala (2005 – 2007)
